SUMMARY

Edge AI and Computer Vision specialist — one of few undergraduates to deploy production deep learning models on resource-constrained hardware (Raspberry Pi 5 + Hailo-8L). 6 months of industry internship experience across face recognition pipelines (93% accuracy, 6-metre range), real-time object detection, and NLP-based fraud detection (98.7% accuracy). Experienced across the full ML lifecycle: data preprocessing, model training and optimization, REST API deployment, and full-stack AI application delivery. Seeking an entry-level Machine Learning Engineer, AI Developer, or Computer Vision role.

WORK EXPERIENCE

Pipra Solutions Pvt. Ltd. Jul 2025 – Oct 2025
Artificial Intelligence and Machine Learning Intern | Hyderabad, India

- Engineered a real-time multi-stage face recognition system using SCRFD detection and ONNX-optimized FaceNet embeddings, achieving 93% accuracy at 6-metre operational range.
- Increased face recognition accuracy by 25 percentage points (70% to 93%) by migrating from Haar Cascades to MTCNN deep learning detection and FaceNet feature extraction.
- Deployed a custom YOLO object detection model on Raspberry Pi 5 with Hailo-8L Edge AI Accelerator, optimizing inference latency for resource-constrained edge computing; integrated with WarePro platform.
- Implemented a WebSocket-based real-time alerting system for unauthorized personnel detection with live mobile push notifications; attended 64 days, participated in agile sprint reviews.

RealMeds Technologies Pvt. Ltd. Oct 2025 – Dec 2025
Artificial Intelligence and Machine Learning Intern | Thiruvananthapuram, Kerala

- Developed AI-driven features for a healthcare platform, performing data preprocessing, feature engineering, and model evaluation using Python, Pandas, and NumPy within an agile development workflow.
- Collaborated with cross-functional teams to integrate machine learning models into the RealMeds product pipeline, ensuring compatibility with healthcare data standards and platform requirements.
- Conducted exploratory data analysis (EDA) and prepared cleaned datasets for model training, improving data quality and reducing preprocessing time by standardising the pipeline.

PROJECTS

JobSpark AI - Fake Job Detection System
Technologies: Python, FastAPI, React, Vite, TF-IDF, Support Vector Machine (SVM), SMOTE, Scikit-learn, Tailwind CSS, Vercel
Live: https://fraud-job-detection-ml.vercel.app | GitHub: https://github.com/PRAHULREDD/fraud-job-detection-ml

- Architected an end-to-end machine learning pipeline for fake job detection achieving 98.7% accuracy, 98.5% precision, and 97.8% F1-score using Support Vector Machine (SVM), TF-IDF vectorization, and SMOTE oversampling on 17,880 real-world job postings.
- Built a FastAPI REST API backend and React (Vite) + Tailwind CSS frontend deployed on Vercel, featuring real-time prediction endpoint and analytics dashboard.

Real-Time Face Recognition System | Pipra Solutions
Technologies: Python, SCRFD, FaceNet, ONNX Runtime, MTCNN, Support Vector Machine (SVM), OpenCV, NumPy

- Designed a production-grade multi-stage face recognition pipeline combining SCRFD detection and ONNX-optimized deep learning embeddings, achieving 93% recognition accuracy and 6-metre operational range in real-time video streams.

SKILLS

Programming Languages: Python, SQL, TypeScript, JavaScript
Machine Learning and Deep Learning: Scikit-learn, TensorFlow, PyTorch, OpenCV, FaceNet, MTCNN, SCRFD, ONNX Runtime, YOLO, Support Vector Machine (SVM), Naive Bayes, Convolutional Neural Networks (CNN)
Natural Language Processing (NLP): TF-IDF Vectorization, SMOTE, Text Classification, Tokenization, Pandas, NumPy
Web Development and APIs: FastAPI, React, Streamlit, REST API, WebSocket, Docker, Vercel, Render
Tools and Platforms: Git, GitHub, Raspberry Pi 5, Hailo-8L Edge AI Accelerator, VS Code, Google Colab, Jupyter Notebook
Concepts: Computer Vision, Edge AI, Model Optimization, Data Preprocessing, Agile Development, Version Control

EDUCATION

Saveetha School of Engineering, Chennai 2023 – 2027
Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science | CGPA: 8.5 / 10
Intermediate (12th Grade): 80% | Secondary School Certificate (10th Grade): 100%

CERTIFICATIONS

NPTEL - Introduction to Internet of Things (IoT) Jan 2025 – Apr 2025
Internship Completion Certificate — Pipra Solutions Pvt. Ltd. | AI/ML Intern | Remark: Outstanding Oct 2025

Languages: English (Professional Proficiency), Telugu (Native), Hindi (Conversational) | **Interests:** LeetCode (DSA), Edge computing, Drone technology, Open-source AI development
