SUMMARY

Edge AI and Computer Vision specialist — one of few undergraduates to deploy production deep learning models on resource-constrained hardware (Raspberry Pi 5 + Hailo-8L). **6 months of industry internship experience** across face recognition pipelines (**93% accuracy**, 6-metre range), real-time object detection, and NLP-based fraud detection (**98.7% accuracy**). Experienced across the full ML lifecycle: data preprocessing, model training and optimization, REST API deployment, and full-stack AI application delivery. Seeking an entry-level **Machine Learning Engineer, AI Developer, or Computer Vision** role.

WORK EXPERIENCE

Pipra Solutions Pvt. Ltd.

Jul 2025 – Oct 2025

Artificial Intelligence and Machine Learning Intern | Hyderabad, India

- Engineered a real-time multi-stage face recognition system using SCRFD detection and ONNX-optimized FaceNet embeddings, achieving **93% accuracy at 6-metre operational range**.
- Increased face recognition accuracy by **25 percentage points (70% to 93%)** by migrating from Haar Cascades to MTCNN deep learning detection and FaceNet feature extraction.
- Deployed a custom **YOLO object detection model on Raspberry Pi 5 with Hailo-8L Edge AI Accelerator**, optimizing inference latency for resource-constrained edge computing; integrated with WarePro platform.
- Implemented **WebSocket-based real-time alerting** for unauthorized personnel detection with live mobile push notifications; attended 64 days, participated in agile sprint reviews.

RealMeds Technologies Pvt. Ltd.

Oct 2025 – Dec 2025

Artificial Intelligence and Machine Learning Intern | Thiruvananthapuram, Kerala

- Developed **AI-driven features** for a healthcare platform, performing data preprocessing, feature engineering, and model evaluation using Python, Pandas, and NumPy within an agile development workflow.
- Collaborated with cross-functional teams to integrate **machine learning models** into the RealMeds product pipeline, ensuring compatibility with healthcare data standards and platform requirements.
- Conducted **exploratory data analysis (EDA)** and prepared cleaned datasets for model training, improving data quality and reducing preprocessing time by standardising the pipeline.

PROJECTS

JobSpark AI - Fake Job Detection System

Technologies: Python, FastAPI, React, Vite, TF-IDF, Support Vector Machine (SVM), SMOTE, Scikit-learn, Tailwind CSS, Vercel

Live: <https://fraud-job-detection-ml.vercel.app> | GitHub: <https://github.com/PRAHULREDD/fraud-job-detection-ml>

- **98.7% accuracy, 98.5% precision, 97.8% F1-score** — end-to-end ML pipeline for fake job detection using Support Vector Machine (SVM), TF-IDF vectorization, and SMOTE oversampling on **17,880 real-world job postings**.
- Built a **FastAPI REST API backend** and React (Vite) + Tailwind CSS frontend deployed on Vercel, featuring real-time prediction endpoint and analytics dashboard.

Real-Time Face Recognition System | Pipra Solutions

Technologies: Python, SCRFD, FaceNet, ONNX Runtime, MTCNN, Support Vector Machine (SVM), OpenCV, NumPy

- **Production-grade multi-stage face recognition pipeline** combining SCRFD detection and ONNX-optimized deep learning embeddings, achieving **93% recognition accuracy** and 6-metre operational range in real-time video streams.

SKILLS

Programming Languages: Python, Java, SQL, TypeScript, JavaScript

Machine Learning and Deep Learning: Scikit-learn, TensorFlow, PyTorch, OpenCV, FaceNet, MTCNN, SCRFD, ONNX Runtime, YOLO, Support Vector Machine (SVM), Naive Bayes, Convolutional Neural Networks (CNN)

Natural Language Processing (NLP): TF-IDF Vectorization, SMOTE, Text Classification, Tokenization, Pandas, NumPy

Web Development and APIs: FastAPI, React, Streamlit, REST API, WebSocket, Docker, Vercel, Render

Tools and Platforms: Git, GitHub, Raspberry Pi 5, Hailo-8L Edge AI Accelerator, VS Code, Google Colab, Jupyter Notebook

Concepts: Computer Vision, Edge AI, Model Optimization, Data Preprocessing, Agile Development, Version Control

EDUCATION

Saveetha School of Engineering, Chennai

2023 – 2027

Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science | CGPA: 8.5 / 10

Intermediate (12th Grade): 80% | Secondary School Certificate (10th Grade): 100%

CERTIFICATIONS

NPTEL - Introduction to Internet of Things (IoT)

Jan 2025 – Apr 2025

Internship Completion Certificate — Pipra Solutions Pvt. Ltd. | AI/ML Intern | Remark: Outstanding

Oct 2025

Certificate of Acknowledgement — ISRO Bharatiya Antariksh Hackathon 2025 | Idea Submission | Code: 2025H2S06BAH25-P06739 2025

Languages: English (Professional Proficiency), Telugu (Native), Hindi (Conversational) | **Interests:** LeetCode (DSA), Edge computing, Drone technology, Open-source AI development
